

RadiatorTrade

DIRECTORY 2009

Radiator, fuel tank and cooling system maintenance and repairs are not the kind of tasks most owners choose to attempt on their own, even if they owned the specialised, expensive equipment required. As for most of the topics covered in our trade directories, an expert with a lot of experience is a better idea. Advances continue to be made in the industry too, so the best specialists are those who keep their eyes open for new, even better

ways to do their job. On the other hand, vintage and veteran owners need people familiar with the old technology, to avoid damaging their vehicles or compromising their originality. Talk to any of the workshops listed here, and you will find good listeners who take an interest to maintain your cooling system to suit the way you use your car, as daily transport, a car club member, a competition car or a concours winner.

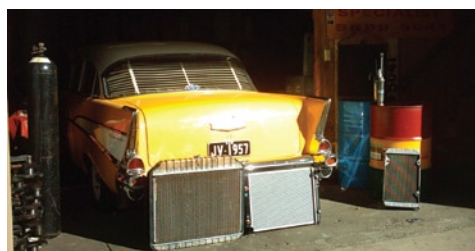

ADRAD RADIATOR EXPERTS

70 Long Street
Smithfield NSW 2164
T 1300 797 003

kevin.chetcuti@adrad.com.au

www.adradradiatorexperts.com.au

This group of radiator experts is an Australian wide network of 70 independently owned radiator specialists. From the smallest heater core to the largest industrial radiator required, no job is too small or too large. Their light automotive production lines run from small heaters, cars and 4WD to mid sized commercial vehicle radiators. ADRAD holds a balance of Australian made and imported products within its central distribution warehouse. As partners of quality suppliers like Koyo and Radicon, the product range is large and varied. The group offers a 5-year nation wide warranty on all ADRAD products.

AFFORDABLE RADIATOR SPECIALIST

15/7 Carrington Road, Castle Hill NSW 2154
02 9899 5041 F 02 9632 8708

rande1950@aol.com

Jeff Fripp repairs and recores classic car radiators, fuel tanks and heaters. The same services are provided to trucks, tractors, earthmoving equipment, dozers and motorcycles. He now also offers an air conditioning service and supplies Redkote fuel tank liner. He regularly attends car shows and encourages fellow enthusiasts to make contact for special discounts. Jeff is a member of the Hudson, Essex, Terraplane, Nash and Rambler Car Club.

DAVIES, CRAIG PTY LTD

77 Taras Avenue, Altona North VIC 3025

T 03 9369 1234 F 03 9369 3456

www.daviescraig.com.au

Davies Craig P/L have been supplying motor vehicle cooling fans for over forty years. The Davies, Craig Electric Water Pump is an alternative to your car's original water pump, plumbed into the bottom radiator hose. It can be used three ways. First, it can replace the vehicle's original water pump by removing the thermostat and impeller. Second, it can be thermal switched to assist the original system. Or third, for chronic overheating, it can run continuously every time you turn on the ignition. It's possible to regulate the flow of coolant so that the engine runs at the correct temperature at all times and also to eliminate the need for the original pump/fan unit altogether, ideal for competition purposes. Davies Craig also supplies a comprehensive range of thermatic fans and a dual digital controller that monitors the operation of the EWP and fan.

RADIATOR DIRECTORY 2009

EASTERN RADIATOR SERVICE

1/17 Waldheim Road, Bayswater Vic 3153

T 03 9720 3353 F 03 9738 0353

easternradiators@bigpond.com.au

After 20 years in the radiator trade, Joe Maricak can help with all your heating or cooling needs, carrying out repairs, recores and changeover radiators on all older and current models and industrial vehicles. Joe is gaining a reputation for vintage and prestige radiator restoration and will also manufacture radiators to suit requirements, such as a triple bypass radiator to increase cooling efficiency. All work is offered at competitive prices.

ENGADINE RADIATORS

5A Mianga Avenue, Engadine NSW 2238

T02 9520 6666 F 02 9520 3662

engrads@people.net.au

Michael MacDonald took over this 30-year-old company 2 years ago. It offers a complete radiator service for all vehicles, carrying out repairs, recores, modifications and cleanouts. Cooling system diagnosis, troubleshooting, head gasket tests and chemical flushing are also available. Fuel tanks and custom made aluminium radiators are manufactured and maintained. Vintage radiators are a specialty. As well, a full air-conditioning service carries out repairs, regassing and various modifications, and heaters are removed and replaced.

YOUR TOTAL AUTOMOTIVE COOLING SERVICE

HUNTINGDALE RADIATOR SERVICE P/L

42 Burlington Street, Oakleigh VIC 3166

T 03 9564 7069 F 03 9564 7072

huntrad@bigpond.com.au

With over 30 years of experience and a motor sport background, Ron Thompson is able to handle all types of radiators - vintage, veteran, classic and modern - as well as manufacture tanks, side bands and various components to suit your vehicle. His shop is fully equipped for all sheet metal work.

JDM INDUSTRIES

25 Godber Road, Eltham VIC 3095

T 03 9438 5291 F 03 9438 1587

jdmind@bigpond.com

If you were rebuilding an engine you wouldn't forget about the water pump would you? John Egglestone of JDM Industries is a classic car enthusiast who is also an expert on water pump reconditioning. Many of you know from experience that as cars get older the chance of obtaining water pump repair kits becomes more difficult. John assures us that he can recondition almost any water pump for most types of cars, tractors and trucks, and will also supply harmonic balancers.

MERV BARLOW RADIATORS

686 Main Road, Edgeworth NSW 2285

T 02 4958 3111 F 02 4958 3160

Merv Barlow offers a complete cooling system service that covers radiators, oil coolers, heaters and cores for cars, trucks, boats and industrial applications. Services range from cleaning, repairs and replacements, and include fuel tank cleaning and repairs. They are vintage car radiator specialists and enthusiasts, and provide custom built radiators and oil coolers.

MOTOR RADIATORS - ADELAIDE

15-19 Halifax Street, PO Box 6146, Adelaide SA 5000

T 08 8231 6256, 131723 F 08 8231 9236,

motorrad@bigpond.net.au

Trevor Story is passionate about radiators. He rebuilds, repairs and recores rads of all types and for all vehicles. He'll custom build in either brass or aluminium and also repair petrol tanks - nothing is too much trouble. A new product is the bush buddy, an on-vehicle hot water system for camping shower facilities.

RADIATOR DIRECTORY 2009

RACE RADIATORS

59 Bennett Street, Dandenong Vic 3175

T 03 9793 2798 F 03 9793 2317

racerads@satlink.com.au

Rod and Chris Stubbs repaired and built conventional copper and brass radiators for many years, but realising there was a need for improved cooling for race cars and motorbikes they set up their business just over twelve years back. They also manufacture aluminium radiators for all types of classic cars so you can retain the appearance while improving the cooling. Rod and Chris can reproduce from samples or drawings and are also now producing custom built intercoolers, oil coolers and water to air intercoolers.

SUPERIOR RADIATOR SERVICE

12 Seton Road, Moorebank NSW 2170

T 02 9600 8238 F 02 9824 2982

mmarkosu@bigpond.net.au

www.superiorradiators.com.au

Mark O'Sullivan founded his radiator and cooling system service in 1982 in the same location for 28 years. They offer quality products, service and workmanship at realistic prices, cater for any type of radiator and specialise in work that other companies may not be able to handle. Other products available are oil coolers, intercoolers, heaters, air condensers and fuel tanks for most vehicle types from sedans, trucks and motorbikes to industrial machines. They can recore and repair aluminium radiators and intercoolers, custom make items and offer a complete air conditioning service.
